Hunting Technology

Up your cybersecurity game with cloud-based holistic security posture that enables you to **integrate** cybersecurity silos, make **data-driven decisions**, and manage individual point products from a **single dashboard!**

Boost your endpoint defenses first

For cybercriminals, corporate endpoints remain the primary target. Protecting multiple point products is more complex than ever.

Employees are using desktops and laptops, both PCs and Macs, in the office and remotely. In many cases, companies are grappling with disparate alerts from multiple point products, and require capability to analyze and remediate potential threats in real-time.

So how do you end the struggle?

The answer: Empower your organization with consolidated security posture for all enrolled mobile and PC endpoints, integrate proven technology with real-time threat intelligence, and unlock opportunities for your business.

Seqrite HawkEye: Comprehensive yet simple security solution

The intuitive single platform will enable coordination between different security layers, integrate cybersecurity silos into a single pane of truth, and ensure your point products communicate with each other to consolidate alerts, identify risks, and convert the data into intelligence. Prevent real-time malware breaches, make insight-driven decisions, and accelerate vital security functions quickly and effectively with just a few clicks.

Simplify

Simplify multiple point products security management from one console.

Consolidate

Streamline alerts and correlate data to make sensible deductions.

Analyze

Gain real-time insights to make data-driven decisions.

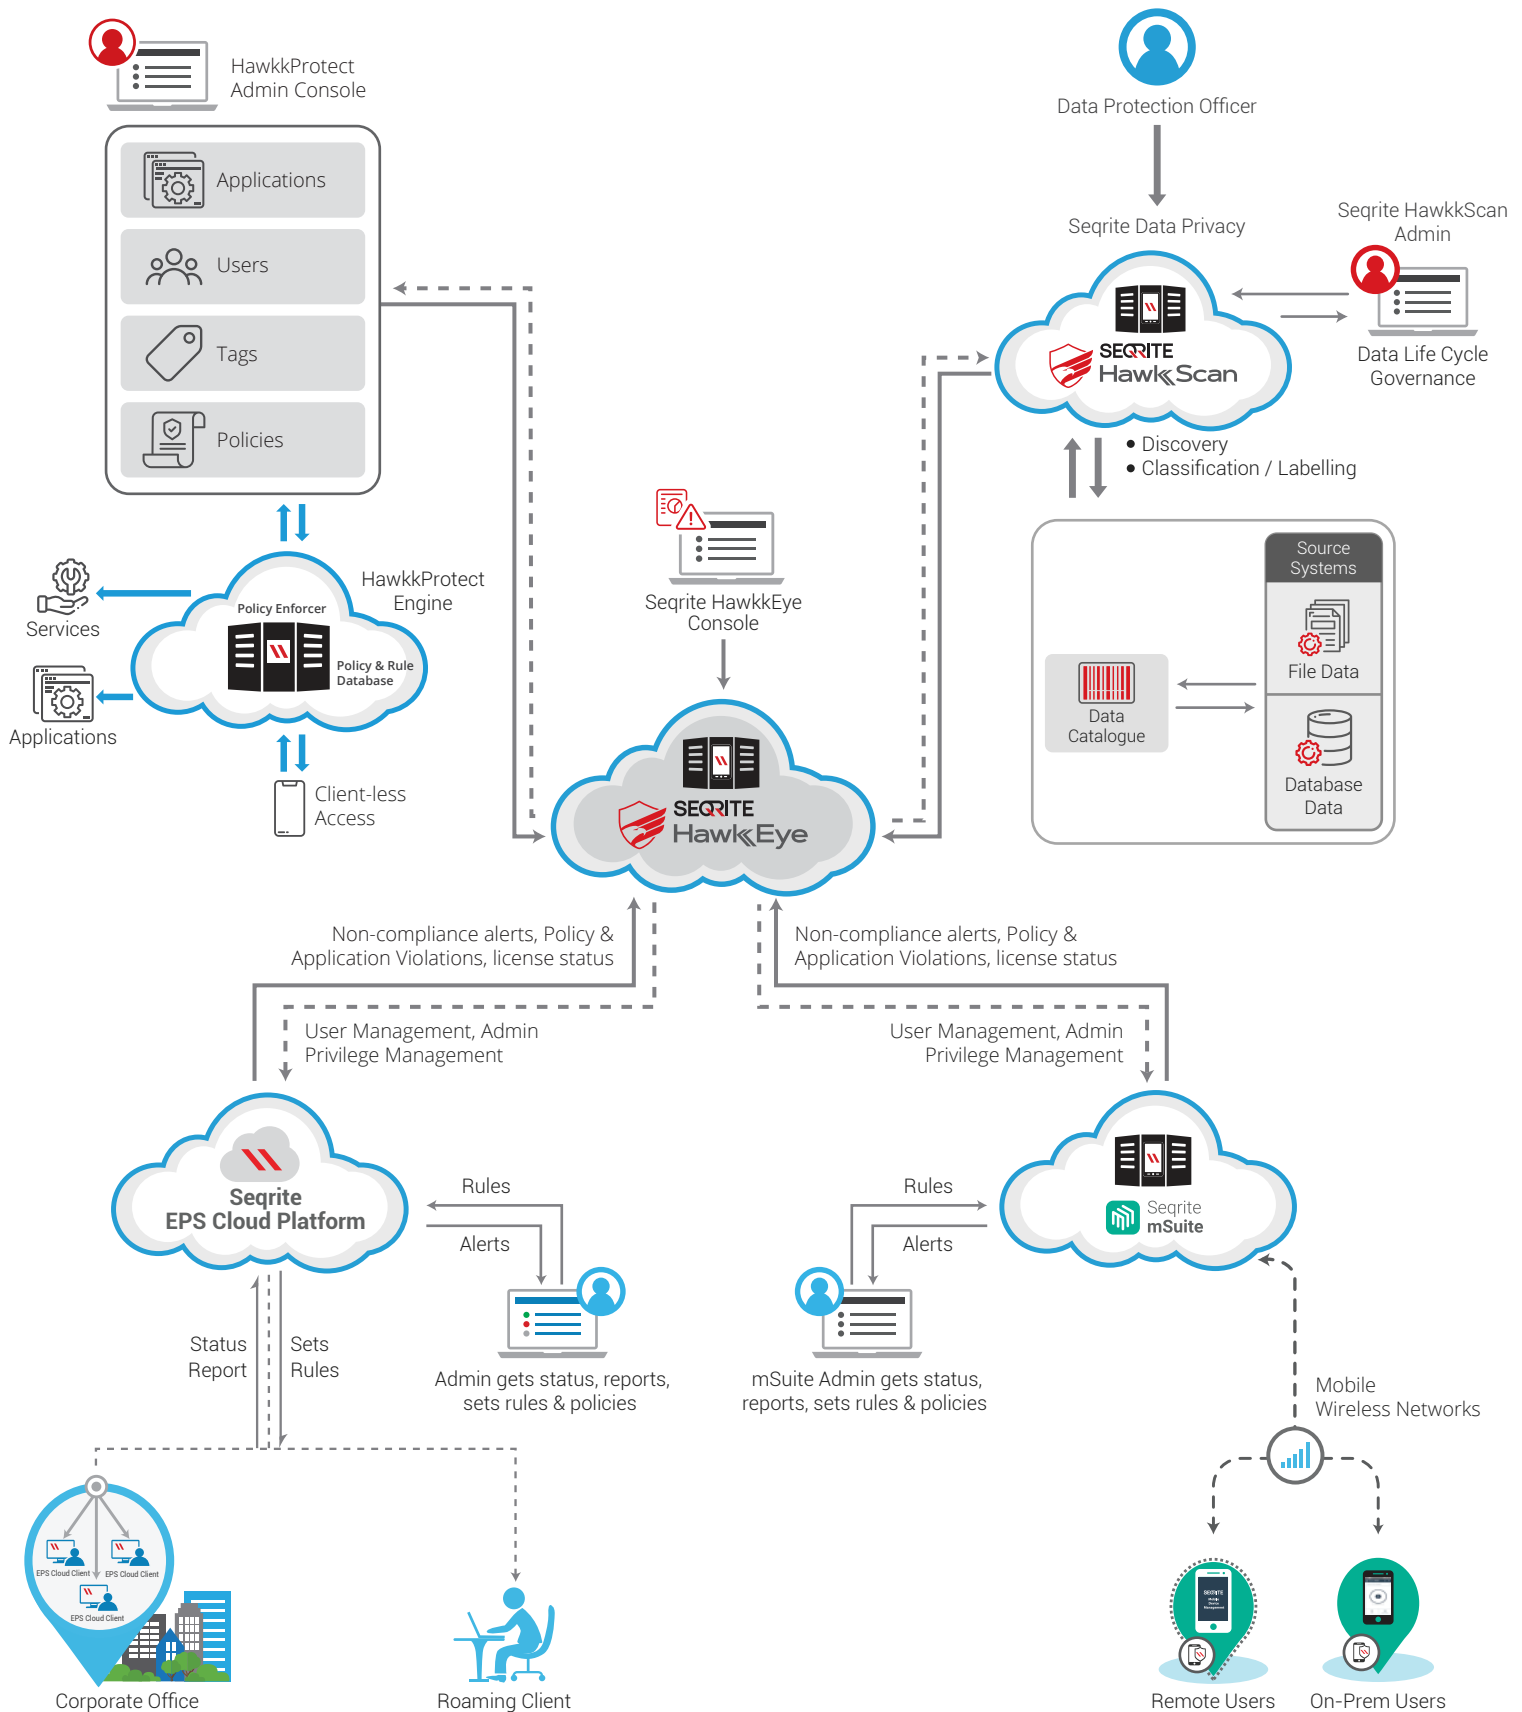

Act

Insights are designed for actual threat reduction and automate remediate actions.

Sophisticated Simplicity

The advanced cutting-edge solution helps enforce compliance, manage users, and helps control IT assets from a single console. Enterprises can get rid of redundant workflows, track events across all endpoints, enforce policies, implement application control, monitor all security events, and stop malicious activity within the network, with just a few clicks.

Why choose Seqrite HawkEye?

Central Visibility

Cloud-based management on a single customizable console to consolidate multiple endpoint security abilities and operate faster.

Simplified Investigation

Real-time dashboards give insights into the security posture of your environment to prevent attacks before disaster strikes.

Powerful Analytics

Correlate data and alerts to create threat intelligence with actionable insights.

Reduced TCO

Built to maximize business agility. Get rid of redundant workflows, save time and money with faster deployment, and simpler management.

Intuitive Workflows

Superior user experience keeping in mind everyday business challenges, time-saving workflows, and enabling easy navigation across products.

Better Performance

Take remediation actions to ensure business security from advanced threats in real time.

Plug & Play Solution

Flexible module based approach to enable businesses to customize the solution to meet their specific cybersecurity needs.

Trial to Commercial Conversion

Convert your individual products trial licenses to commercial licenses from the HawkEye portal with just a few clicks. Simple, fast, and efficient, customers can now use all the features uninterrupted.

Two Factor Authentication

Add an extra layer of security to your login process with Google Authenticator. Get a verification code and login to the HawkEye Portal safely every time.

Magnified security across all types of endpoints

Seqrite HawkEye is an integrated platform hosting various industry-leading solutions under a unified cloud-based console.

Seqrite Endpoint Security (EPS)

EPS provides enterprise security for every connected endpoint against cyber attacks from a single platform.

Seqrite Data Loss Prevention (DLP)

DLP feature prevents unauthorized loss, pilferage, or leakage of confidential company data.

Seqrite HawkEye (EDR)

Advanced, endpoint protection, detection, and incident response solution in a single unified console.

Seqrite mSuite

Mobilize your workforce, remotely manage enterprise devices on-the-go, and secure sensitive business data with advanced enterprise mobility management solution.

Seqrite Workspace

Enhance productivity and secure official apps and data through a virtual container on an employee device without compromising employee privacy with unified BYOD Management Software.

Seqrite HawkProtect

Secure client-less remote access to enterprise applications and services for your employees, contractors, and third-parties.

Seqrite HawkScan

Powerful privacy-data classification and labelling platform for complex and heterogenous enterprise data landscapes.
